SPUR INDUSTRIAL MACHINERY
AND EQUIPMENT OUTPUT

FACTORY PRODUCES METAL EQUIPMENT -- Ljubljana, Slovenski Porocevalec, 6 Dec 50.

The "Djuro Djakovic" Factory will soon complete the construction of equipment for 14 new factories. At present, the factory is constructing machinery and equipment for ten concrete-products factories. These factories will produce material used in road-building and construction. The "Djuro Djakovic" Factory has already completed the construction of concrete mixers, stone crushers, and special dump? cars. At present the factory is constructing grading tables, conveyers, and equipment for washing and sorting gravel.

By the end of 1950, the factory will finish construction of complete equipment for two asbestos and two gypsum factories. The "Djuro Djakovic" Factory was assigned to construct special machines for processing asbestos fibers. It has already completed the construction of machines for extracting asbestos fibers from ore. By the end of 1950, it will have completed the remaining equipment for these factories. The factory has already constructed the machinery for calcining, milling, and further processing of gypsum. This machinery is made from an alloy of zinc and iron.

By the end of 1950 the factory, together with other factories, will have completed, 12 sets of oil-drilling equipment. The shop for constructing bridges is building oil-drilling towers, and the locomotive shop of the factory is constructing oil-drilling pumps. The "Rade Koncar" Factory is constructing special electric motors for drilling equipment, and the "Ivo Lola Ribar" Factory is constructing special parts for the 12 sets of drilling equipment. This year it the "Djuro Djakovic" Factory? also has completed some of the equipment for the smelter in Trepca, and a boiler which produces 32 tons of steam every hour for the thermal power plant in Trepca. Two identical boilers are now being installed in the shoe and rubber combine in Borovo. By the end of this year, the factory will have constructed similar boilers for the ironworks in Zenica and Sisak, as well as for the soda factory in Lukavac.

TO PRODUCE MACHINES FOR IRONWORKS -- Ljubljana, Slovenski Forocvalec, 12 Dec 50

The "Ivo Lola Ribar" Factory will devote 85 percent of its production capacity to the production of machinery and equipment for the ferrous metallurgy industry in 1951. The factory has agreed to build equipment for beds and medium rollers for the new rolling mills in Zenica and Jesenice. The factory has already cast 35-ton parts for the rolling equipment of the rolling mill in Zenica; however, it is able to cast parts weighing up to 80 tons. It will continue to build equipment for the seamless-pipe-rolling mill in Sisak and machinery for the wire-rolling mill in Smederevo. The factory is short of highly skilled workers; only 60 percent of its workers are skilled.

MAKES MINING AND CONSTRUCTION MACHINERY -- Belgrade, Rad, 13 Dec 50

The "14 Oktobar" Mining and Construction Machinery Factory in Krusevac produces concrete mixers, rotary excavators, mining cars, and other types of cars. In 1949 the factory produced 600 cars; during the first 11 months of 1950 it produced 4,000 dump cars, several thousands of mining cars, and several thousands of other types of cars. At present the factory is producing 20 large rotary excavators. Soon it will complete construction of the prototype of a grading table.
